

PUBLIC WORKSHOP

December '04

Welcome

Welcome to the Choptank Road Improvements Project public workshop. The goal of the project is to improve the traffic operations and safety along Choptank Road.

As you explore the various display boards and plans, you will find many of the comments from previous meetings have been addressed by the project team and some design changes have resulted.

In today's workshop, you are encouraged to explore the displays and talk to project team members about the project. Please take a comment form so you may write down any ideas, questions, or concerns you may have.

Your thoughts are important.

As you view the displays, you may want to think about these questions:

- Do you feel the suggested improvements will address the traffic and safety needs of the project area?
- Were concerns you had about the project addressed or explained to your satisfaction?

Choptank Road at Old School House Road.
